Balance Sheet Trends

In Q3-21 net loans grew by AED 0.1 billion as a record demand for retail financing was largely offset by a decline in corporate lending due to repayments and the FX translation impact from DenizBank. DenizBank loans grew by 10% in local currency terms in 2021 and were down 8% due to the FX translation impact.

Deposits grew 2% in Q3-21 with AED 5 billion further growth in CASA and AED 4 billion growth in Fixed Deposits as the Group conservatively maintained access to all sources of funding.

Liquidity remains strong with the Liquidity Coverage Ratio at 157.2% and the Advances to Deposits Ratio at 94.0%. During the first nine months of 2021, the Group raised AED 21.9 billion of senior term funding, taking advantage of historically low cost of term funding.

During Q3-21 the Non-Performing Loan ratio improved by 0.1% to 6.2% whilst the Coverage ratio strengthened further to 126.7%, demonstrating the Group's continued prudent approach towards credit risk management.

Outlook

The outlook for the UAE economy is positive, with Expo 2020 Dubai predicted to boost domestic demand and the easing of travel restrictions in key markets expected to support the recovery in tourism and hospitality. Emirates NBD Research expects the non-oil economy to grow by 3.5% this year, and revised their forecast for headline GDP growth up to 1.9% from 1.5% previously on the back of higher oil production.

The Kingdom of Saudi Arabia's economy is also expected to benefit from increased oil output in the coming months, and GDP is forecast to grow by 2.5% in 2021. Higher oil prices will help reduce the budget deficit to just 1.1% of GDP this year, and a number of initiatives have been announced to boost domestic investment.

The Egyptian economy has held up well in the face of the global pandemic, making it one of the few countries in the world to register positive GDP growth in 2020. While GDP growth slowed to 3.3% in the fiscal year ended June 2021, it is expected to accelerate to 5.3% next year.

Turkey also posted positive GDP growth in 2020, and the market expects growth to accelerate to 8.5% this year. However, inflation uncertainty may continue to weigh on the Lira.
