Introduction

The Central Bank of the UAE (CBUAE) supervises Emirates NBD (P.J.S.C.) (the “Bank”) and its subsidiaries (together referred to as the “Group”) on a consolidated basis, and therefore receives information on the capital adequacy of, and sets capital requirements for the Group as a whole. The capital requirements are computed at a Group level using the Basel III framework of the Basel Committee on Banking Supervision (“Basel Committee”), after applying the amendments advised by the CBUAE, within national discretion. The Basel framework is structured around three ‘pillars’, Pillar 1 minimum capital requirements and Pillar 2 on supervisory review process complemented by disclosures under Pillar 3 on market discipline.

Pillar 3 disclosures

Pillar 3 disclosures complement the minimum capital requirements and the supervisory review process. Its aim is to encourage market discipline by developing disclosure requirements which allow market participants to assess specified information on the scope of application of Basel III capital, particular risk exposures and risk assessment processes, and hence the capital adequacy of the Group. Disclosures consist of both qualitative and quantitative information and are provided at the consolidated level.

The CBUAE issued Basel III capital regulations, which came into effect from 1 February 2017 introducing minimum capital requirements at three levels, namely Common Equity Tier 1 (CET1), Additional Tier 1 (AT1) and Total Capital. Additional capital buffers (Capital Conservation Buffer (CCB) and Countercyclical Capital Buffer (CCyB) - maximum up to 2.5% for each buffer) introduced are over and above the minimum CET1 requirement of 7%.

In November 2020, CBUAE issued revised standards and guidelines for capital adequacy in the UAE. The new version to the standards also includes additional guidance on the topics of Credit Risk, Market Risk, and Operational Risk. In December 2022, CBUAE published revised capital standards and guidelines mainly focused on updates on Pillar 2.

CBUAE requires the Pillar 2 - Supervisory Review Process to focus on each bank’s Internal Capital Adequacy Assessment Process (ICAAP) in addition to Pillar 1 capital calculations. The ICAAP include a risk based forward looking view of, but not limited to, Credit, Market and Operational Risk capital.

The revised Pillar 3 disclosures, based on a common framework, are an effective means of informing the market about the risks faced by the Group, and provide a consistent and understandable disclosure framework that enhances transparency and improves comparability and consistency.

In compliance with the CBUAE Basel III standards and guidelines, these disclosures include qualitative and quantitative information on the Group’s risk management objectives and policies, risk assessment processes, capital management and capital adequacy. The Group’s Pillar 3 disclosures are in line with the key elements governed by the disclosure policy framework consistent with CBUAE Basel III standards which is approved by the Group Board Audit Committee.

Verification

The Pillar 3 disclosures for the quarter ended 31 March 2025 have been reviewed by the Group's internal auditors.

Implementation of Basel III standards and guidelines

The Group is compliant with Standardised Approach for Credit, Market and Operational Risk (Pillar 1) as applicable as of 31 March 2025.

The Group also assigns capital on other than Pillar 1 risk categories which are part of the Pillar 2 framework.

Group Structure

The Bank was incorporated in the United Arab Emirates on 16 July 2007 consequent to the merger between Emirates Bank International P.J.S.C. and National Bank of Dubai P.J.S.C., under the Commercial Companies Law (Federal Law Number 8 of 1984 as amended) as a Public Joint Stock Company (P.J.S.C.).

The Bank is listed on the Dubai Financial Market (TICKER: "EMIRATESNBD"). The Group's principal business activities are corporate and institutional banking, retail banking & wealth management, global markets & treasury (GM&T) and islamic banking. The Bank's website is www.emiratesnbd.com.

For details of Group's subsidiaries refer to Pillar 3 disclosures for year ended 31 December 2024 available on the Bank's website.

Key metrics for the Group (KM1)

Key prudential regulatory metrics have been included in the following table:

Key metrics for the Group (KM1) (continued)

Quarter on quarter CET1 capital increased by AED 5.3 billion driven by pre-hyperinflation profit for the quarter partially offset by cessation of ECL add back and adverse movement in currency translation reserve.

Refer overview (OV1) disclosure for further details on Risk Weighted Assets (RWAs).

¹ “Fully Loaded” means Group’s regulatory capital compared with a situation where the transitional arrangement (if any) had not been applied. There are no transitional arrangements applicable on 31 March 2025.

CBUAE had introduced transitional arrangements as per circular no. 04/2020 “Regulation Regarding Accounting Provisions and Capital Requirements - Transitional Arrangements”.

Pursuant to the above circular, CBUAE issued a regulation for a ‘Prudential Filter’ that permitted Banks to add back increase in IFRS 9 provisions (stage 1 and stage 2) to the regulatory capital over a transition period of 5 years for the years 2020 to 2024, on a proportionate basis. The said prudential filter ended on 31 December 2024.

² *Impacts of implementing IAS 29 - Hyperinflation accounting in Financial Statements, are excluded from regulatory ratios calculations.*

Overview of Risk-Weighted Assets (RWAs) (OV1)

The following table provides an overview of total RWAs forming the denominator of the risk-based capital requirements:

AED in millions		31 March 2025	31 December 2024	Minimum capital requirements 31 March 2025
1	Credit risk (excluding counterparty credit risk)	613,531	589,675	89,391
2	Of which: standardised approach (SA)	613,531	589,675	89,391
3	Counterparty credit risk (CCR)	9,707	7,751	1,414
4	Of which: standardised approach for counterparty credit risk	9,707	7,751	1,414
5	Credit valuation adjustment (CVA)	6,822	5,007	994

14	Of which: standardised approach (SA)	21,599	16,550	3,147
15	Operational risk	73,920	71,290	10,770
16	Total (1+3+5+8+13+15)	725,681	690,375	105,731

The regulatory minimum capital requirement is calculated at 14.57% of the RWA including CBUAE assigned capital buffers.

Credit Risk-Weighted Assets (excluding CCR) increased by AED 23.86 billion during the quarter due to growth in lending and off balance sheet exposures.

Market Risk-Weighted Assets are mainly driven by increase in trading book investments.

Operational Risk-Weighted Assets (ORWA) increased due to higher average operating income of last 3 years, as Q1 2025 replaced the lower operating income of Q1 2022.

Leverage ratio

Summary comparison of accounting assets versus leverage ratio exposure (LR1)

The following table reconciles the total assets in the published financial statements to the leverage ratio exposure measure:

AED in millions		31 March 2025	31 December 2024
1	Total consolidated assets as per published financial statements	1,030,570	996,582
2	Adjustments for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	3,107	3,889
3	Adjustment for securitised exposures that meet the operational requirements for the recognition of risk transference	-	-
4	Adjustments for temporary exemption of central bank reserves (if applicable)	-	-
5	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	-	-

22 Total net cash outflows		132,151		119,525
23 Liquidity coverage ratio (%)		189.20%		201.85%

The Group maintained LCR of 189.20% (Dec 2024: 201.85%) on an average during first quarter of the reporting year and 184.16% (Dec 2024: 197.28%) as of 31 March 2025 reporting period comfortably well above the regulatory minimum of 100%. The LCR is influenced by the amount, profile of the funding base and the deployment of funding into customer lending or HQLA investments. The deployment alternatives are assessed on an ongoing basis and adjusted as per the market opportunities, while maintaining a prudent LCR surplus.

The HQLA over the reporting period was AED 250 billion (Dec 2024: AED 241 billion) and 91% (Dec 2024: 91%) of this comprised of HQLA Level 1 assets, which represents balances held with Central Bank and other high quality sovereign securities. HQLA Level 2A and 2B assets comprised the remaining 9% (Dec 2024: 9%) of the total HQLA. The HQLA presented excludes excess liquidity held at subsidiaries that is deemed not transferable within the Group.

The retail deposits are prescribed a lower run-off factor and comprise 15% (Dec 2024: 16%) of the total cash outflow, whereas wholesale funding is prescribed a higher run-off and comprise 56% (Dec 2024: 58%) of the total cash outflows.

The Group manages liquidity at currency level and cross currency funding is utilized appropriately to manage the currency gaps. The Group measures LCR for major currencies and meets the local currency LCR as per the applicable local prudential requirements.

Glossary

Capital conservation buffer

A capital buffer prescribed by BCBS and CBUAE under Basel III and designed to ensure banks build up capital buffers outside periods of stress which can be drawn down as losses are incurred. Should the bank's CET1 capital fall within the capital conservation buffer range, capital distributions will be constrained by the regulators.

Countercyclical capital buffer (CCyB)

The countercyclical capital buffer is part of a set of macroprudential instruments, designed to help counter pro-cyclicality in the financial system. CCyB as defined in the Basel III standard provides for an additional capital requirement of up to 2.5 per cent of risk-weighted assets.

Counterparty credit risk (CCR)

The risk that a counterparty defaults before satisfying its obligations under a derivative, a securities financing transaction (SFT) or a similar contract.

Credit conversion factor (CCF)

As prescribed by CBUAE, an estimate of the amount the Group expects a customer to have drawn further on a facility limit at the point of default.

Credit risk adjustment (CRA)

This includes impairment allowances or provisions balances, and changes in ECL.

Credit risk mitigation (CRM)

Credit risk mitigation is a process to mitigate potential credit losses from any given account, customer or portfolio by using a range of tools such as collateral, netting agreements, credit insurance, credit derivatives and guarantees.

Domestic systemically important banks (D-SIB)

Domestic systemically important banks are deemed systemically relevant for the domestic financial system in which they operate. The CBUAE and the BCBS have developed a framework for identifying and dealing with D-SIBs. The Central Bank of the UAE annually assesses national banks at their consolidated group level and foreign banks at their UAE branch level; to designate banks whose failure could escalate to systemic risk for the UAE banking sector and eventually impact the economy.

Internal capital adequacy assessment process (ICAAP)

A requirement under Pillar 2 of the Basel framework to undertake a comprehensive assessment of their risks and to determine the appropriate amounts of capital to be held against these risks.

Leverage ratio

A ratio introduced under Basel III/CRD that compares Tier 1 capital to total exposures, including certain exposures held off-balance sheet as adjusted by stipulated credit conversion factors. Intended to be a simple, non-risk based backstop measure.

Liquidity coverage ratio (LCR)

The ratio of the stock of high-quality liquid assets to expected net cash outflows over the following 30 days. High quality liquid assets should be unencumbered, liquid in markets during a time of stress and, ideally, be central bank eligible.

Glossary (continued)**Net stable funding ratio (NSFR)**

The ratio of available stable funding to required stable funding over a one-year time horizon, assuming a stressed scenario. It is a longer-term liquidity measure designed to restrain the amount of wholesale borrowing and encourage stable funding over a one-year time horizon.

Securities financing transactions (SFT)

Securities Financing Transactions are secured (i.e. collateralised) transactions that involve the temporary exchange of cash against securities, or securities against other securities, e.g. stock lending or stock borrowing or the lending or borrowing of other financial instruments, a repurchase or reverse repurchase transaction, or a buy-sell back or sell-buy back transaction.

Standardised approach (SA)

In relation to credit risk, a method for calculating credit risk capital requirements using External Credit Assessment Institutions (ECAI) ratings and supervisory risk-weights. In relation to operational risk, a method of calculating the operational risk capital requirement by the application of a supervisory defined percentage charge to the gross income of eight specified business lines. Standardised Approach for market risk covers Interest rate, Equity, Foreign Exchange, Commodity, and Options Risks.
